4. Handling Precautions 产品使用注意事项

4.1 Product use and installation instructions 产品使用安装说明

- Clean the installation surface.
将安装表面进行清理干净。
- Take out the flexible strip from the reel.
将柔性灯带从卷盘上取出。
- Place the products close to the mounting surface in sequence.
将产品依次序紧贴于安装表面。
- After mounting the flexible strip on the surface, connect the power supply lead of this product to the driver output terminal and do proper insulation treatment, paying attention to the polarity of the lead.
将柔性灯带安装表面后，将本产品供电导线连接到驱动器输出端中，并做适当绝缘处理，注意导线极性。
- After the product cable is installed, connect the driver to the test power to supply power to the Driver.

产品连接线安装完成后，将驱动器连接到市电当中，对驱动器进行供电。

4.2 Handling Precautions 产品使用注意事项

- ▶ The power supply voltage should be the same as that indicated on the LED flexible strip, and appropriate safety devices should be installed.

电源电压应与 LED 软灯带所标示一致，并安装适当保险装置。

- ▶ Observe if the positive and negative poles of the power supply before installation, and connect them properly, otherwise the light strip will be damaged.

安装前观察好电源正负极后，正确连接，否则会损坏灯带。

- ▶ Do not apply power to the light strip during the installation of the goods. To avoid short-circuit failure of the light strip caused by operating errors during operation, the power can only be connected under the condition of connection, installation and correctness.

请勿在安装货装配灯带过程中通电操作，避免作业过程中操作失误导致灯带短路失效，只有接驳、安装好且正确的情况下才能接通电源。

- ▶ The flexible LED strip can only be cut at the silk-screened scissors mark on the light strip, and other places will damage the circuit of the light strip and cause some of the lamp beads to fail.

LED 软灯带只能在灯带上丝印有剪刀标记处剪开，其他地方剪开会损坏灯带电路回路，导致部分灯珠不亮现象。

- ▶ The interface must be firm and free from short-circuit risks. For outdoor installation, each interface must be sealed with neutral glass glue, or waterproof connectors should be used for splicing to ensure that water does not enter the interface.

接口必须牢固，无短路隐患，户外安装时，各接口必须用中性玻璃胶密封接口，或使用防水连接器进行拼接，保证接口处不进水。
